CORE COMPETENCIES

- Scalable Systems Design
- Microservices Architecture
- Team Leadership
- REST API Development
- Automation Frameworks
- Cloud Computing (AWS- ELB, EFS, EC2, RDS, Lambda, Digital Ocean)
- Software Engineering
- Spring Boot & Spring Kafka
- Database Management (MySQL, Oracle, Cassandra, Elastic Search)
- Design Patterns (SOLID, DRY, KISS, YAGNI)
- Agile Methodologies
- Technical Mentorship & Code Reviews
- Conducting Interviews

TECHNICAL SKILLS

- **Java 1.11**
- **Framework -** Spring boot, Spring Reactive Programming, Spring JPA and JDBC Template, Apache Camel, Hibernate, Log4j, Spring Kafka
- **Database -** MySql, PostgreSql, Apache Cassandra, Redis Cache, Elastic Search
- **Design Pattern & Principle -** SOLID, DRY, KISS, YAGNI
- **Cloud Technologies -** AWS- ELB, EFS, EC2, RDS, Lambda, Digital Ocean
- **Testing Framework -** JUnit, Mockito, Power Mock, Cucumber
- **Server -** Tomcat, Weblogic
- **Operating Systems -** Windows, Linux, Android
- **Version Control System -** Git, SVN
- **Tools -** Eclipse, STS, IntelliJ,

PROFILE SUMMARY

- Accumulated over 10 years of comprehensive experience in software development, specializing in building scalable systems and leading teams within the technology sector, demonstrating a strong commitment to excellence and innovation.

- Currently serving as a Team Lead at Belzabar Software Design Pvt. Ltd., overseeing a talented team of engineers to drive product development and ensure the delivery of high-quality software solutions.

- Developed a robust skill set through various roles, including technical leadership and software engineering, with a focus on microservices architecture, RESTful API development, and automation frameworks, enhancing both technical and managerial capabilities.

- Achieved significant improvements in product functionality and team performance by implementing innovative solutions and fostering a collaborative work environment, resulting in a marked increase in project delivery efficiency.

- Demonstrated expertise in designing and implementing automation frameworks that streamline processes and enhance productivity, contributing to the overall success of software projects.

- Well-versed in the latest industry trends and technologies, with a keen ability to adapt to evolving market demands and integrate new solutions into existing systems, ensuring relevance and competitiveness.

WORK EXPERIENCE

Team Lead   **June 2023 – Present**

Belzabar Software Design Pvt. Ltd. (New Delhi)

Belzabar offers a SaaS-based platform that automates processes for guides, activities, and projects. The Automation Designer Tool enables users to create REST APIs with minimal programming knowledge.

As Team Lead, responsible for overseeing both the development and technical execution of these products, ensuring their successful delivery and continuous enhancement.

Key Result Areas:

- Leading a team of 8 professionals to drive product innovation and maintain product excellence.

- Developing detailed approach documents and conducting Proof of Concepts (POCs) for major product features.

- Collaborating with the implementation team to address technical queries and ensure the smooth execution of projects.

- Conducting code and team reviews to uphold high coding standards.

- Facilitating design discussions and resolving technical queries within the team.

- Managing the recruitment process by conducting interviews and building an efficient development team.

- Contributing directly to the development of critical product features and

Postman, Swagger, Maven

EDUCATION

Master of Computer Applications (MCA) – 76% (2013, UPTU, India)

PERSONAL DETAILS

Address: New Delhi, India
Languages Known: English and Hindi

functionalities.

Technical Lead   **April 2021 – April 2023**

Infinite Computer Solutions (Bangalore)

Client: Western Union, Pune, India

Key Result Areas:

- Spearheaded the transition of the existing digital payment system to a microservices architecture.
- Designed and developed microservices for essential functions, including Request Money, Quotes, Corridors, Limits, and Price Catalog APIs.
- Applied advanced design patterns (Orchestrator, Chaining) to address and resolve complex business challenges.
- Developed utility microservices such as Common Notification and Captcha Verification, which were consumed by other microservices within the system.

Senior Software Developer   **October 2018 – April 2021**

Amdocs (Pune)

Key Result Areas:

- Part of a development team focused on building service APIs to orchestrate telecom service workflows.
- Enhanced the search functionality of an existing system by implementing a microservice with Elasticsearch, which increased search API throughput by 45%.
- Independently designed and developed key systems such as the Admin Tool and Scheduler from scratch.

Software Engineer   **February 2017 – October 2018**

Stratawiz Technologies (Pune)

Key Result Areas:

- Developed REST web services for the Salesforce engagement platform "Rapport."
- Created real-time scoring and ranking algorithms for a sales competition, boosting sales per quarter by 45% and increasing transparency across the sales team.
- Implemented an SMS, email, and push notification mechanism that increased user engagement by 15%.
- Built a Video Personalization Platform that allowed users to apply filters, images, and text to create customized video greetings.

Software Developer   **October 2014 – February 2017**

Ubitech Systems (Pune)

Key Result Areas:

- Developed REST APIs for various mobile applications, including Della, Marshal, and Fruiteway.
- Designed and developed a Token Calling System for scheduling doctor's appointments.

- Created the Crusher ERP System, a site management tool for real estate builders, improving operational efficiency and tracking.
